The Details: *Speedy Dialer* & *Cheetah* Software

Stop dialing phone lists by hand!
Save lots of time!
Speedy Dialer and I can help you
make all your calls.

What is *Speedy Dialer*?

Speedy Dialer is a computerized telephone dialer (external hardware device) that plugs into the back of your computer (into the serial or USB port). It is NOT a voice modem; **Speedy Dialer** is a sophisticated single line device that includes a built-in telephone. **Speedy Dialer** allows you to make telephone calls much faster and more efficiently than using voice modems or dialing by hand; therefore, you can make many more calls per hour.

What is *Cheetah* Power Dialer Software?

Cheetah is a software product that includes a phone list manager (CRM) for your lists of customers and prospects. Your lists can contain names, addresses, phone numbers, email addresses, and other information you need. You can import your lists into **Cheetah**, then speed dial those telephone numbers using **Speedy Dialer**. There are 3 ways to dial: 1) Type in a phone number, 2) Click with your mouse on a phone number, or 3) Check the "Power Dial" box whenever you want it to automatically dial those phone numbers for you, one after the other. When Power Dialing, it dials the first number and pops the contact information up on your screen. When you are finished with that call, it automatically dials the next phone number in your list and pops up that screen. You can talk and make notes or additions or changes on the screen. It's a very inexpensive alternative to a predictive dialer.

Features include:

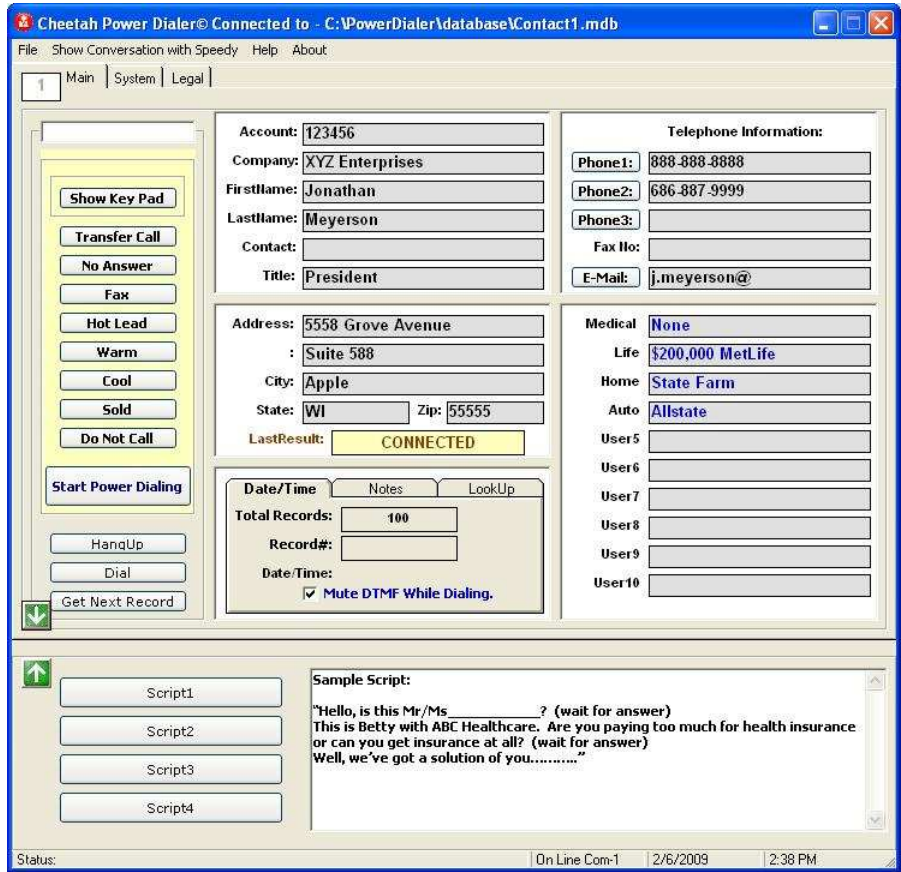

- **Cheetah** operates on either a Desktop or Laptop PC with either Windows XP or Vista.
- Agents can hear the dialing and the answering of the telephone so there are no dropped calls.
- Agents can instantly speak to the person who answers the telephone, or that telephone number can be marked as a fax, answering machine, etc.
- If the phone number is busy or if there is no answer, it will automatically hang up and dial another number and can redial that number later.
- No calls are dropped since each live answer is always connected to a live agent.
- Agents will be able to view any information you have about the person who has been called.
- Agents can make additions or changes to the data and type notes during each call.
- Agents can read scripts on the screen.
- Agents can just click to send any of your pre-typed E-mails.
- Calls can be transferred to someone else.
- Conversations can be recorded with the click of a mouse.
- Agents can use either wired or wireless headsets.
- If the call is answered by someone's voice mail or answering machine, the agent can click a button to play a pre-recorded message, rather than have to speak the same message each time.
- Reports are available showing the results of the calls.
- "Do Not Call" management and "scrubbing" is included to help protect against dialing anyone on a federal, state, or private "Do Not Call" list, if needed for your application.

Portability

Cheetah will only work on the computer on which the **Speedy Dialer** is attached, but you may move it from computer to computer as needed. Example: To make calls during the day, you use your office desktop PC, then you take the **Speedy Dialer** home to use on your laptop that night to make more calls.

**Cheetah
Power Dialer**

Networking Multiple Agents for Power Dialing

- You can start with only one **Cheetah** and add more as needed.
- Each can be independent or you may network multiple agents to a server to access your lists of customers and prospects.
- The number of agents you can network will depend on several factors including your data base type and size, how many users are on the network, and the speed of the network.
- Windows XP Home will network up to 4 stations and Windows XP Pro will network up to 10 stations. To network more than 10 stations, Windows 2000 Server or 2003 Server is required.
- Wireless networks are not supported since they are too slow.
- You will need a network technician or administrator if you want to network your computers together.

Optional: Spider Web-based CRM Available

As an option, you can choose to use an **internet based Contact Relationship Management (CRM)** rather than using premise based phone lists on your PC hard drive. A CRM is a data base of names, addresses, and other contact and sales information. Either you or EVS can host a personalized CRM for your company so that agents can access and make calls from your phone lists from anywhere in the world. If you choose for EVS to host your CRM, we will use our **Spider Web Sugar CRM**, which is a CRM that can be tailored to suit each company that uses it. There is a \$100 setup fee, plus a hosting fee of \$25 per month or \$250 per year per agent.

Tool Kit
"Design your own applications."

- A free Tool Kit is available for developers and programmers who wish to design their own applications using our *Speedy Dialer* external telephony boards.
- *Speedy Dialer* does not use TAPI.
- Applications can operate on Microsoft Windows 98, NT, 2000, XP, Vista and also on Linux.
- Custom design work and web hosting/managing are also available.

What You Get When You Buy

Speedy Dialer

Rear View

Front View

Inside View

Designed & Manufactured in the USA  Dimensions: Width 5" x Length 5" x Height 1.5"

Cheetah Power Dialer Software & Manual on CD

Warranty: Speedy Dialer & Cheetah are covered by a one year warranty.
Technical Support is included: 1 hour or 1 year (whichever comes first).

Accessories also included:

PC Headset with microphone *
USB Cable
Telephone Cable
Audio Cables
Power Transformer **

- * We use Plantronics headsets/microphones-your choice of monaural (1 ear) or binaural (both ears).
 - ** Included transformers are designed and approved for use in USA & Canada; users in other countries will need a wall plug transformer that can provide an output voltage of 9 to 12 volts DC at a minimum of 200 milliamps current to the Speedy Dialer DC power input jack. The wall plug transformer input voltage and frequency must match the voltage and frequency of the local wall plug being used. The wrong transformer will damage the Speedy Dialer.
- Accessories are covered by 30 day warranty.

Want to use a Wireless Headset?

Even though a wired headset is included, you may want to use a wireless telephone headset such as a Plantronics CS55. It cannot plug directly into your Speedy Dialer analog jacks, so you will need an adapter called ZoomSwitch Analog Handset Phone Switch. It sells for about \$30.

Purchase from: Headset Experts, Virginia Tames 800-641-6416 x 104

What You Need To Supply

1) Telephone Line: One standard business or residential analog telephone land line. You may also use Vonage or another VoIP service, as long as an analog jack is provided and the voice quality is good. Vonage and other VoIP services require a high speed internet connection.) Note: If Call Transfers will be needed when making calls, your telephone line will need the "call transfer disconnect" feature from your land line telephone company.

2) Computer:

If you provide a computer:

Operating System: Windows XP Home or Pro or Vista Home Premium, Business, or Ultimate

Minimum System Requirements: 1 GHZ processor, 512 Megs of RAM, 10 MB of available hard drive space, Super VGA Monitor, Keyboard, Mouse, Sound Card, and available Serial or USB port Important Note: If you will be importing large lists of telephone numbers, you may need a faster processor, more megabytes of RAM, and more hard drive space.

Surge Protector & Battery Backup: To protect your hardware, software, and data.

Dedicated Use: While dialing, your computer should only be used for the Speedy Dialer product.

Recommended: High Speed Internet connection,

If you purchase our computer:

Price, specifications, and appearance are subject to change.

* **EXPRESS ONE YEAR LIMITED WARRANTY:** Manufacturer warrants that its hardware and software will be free of any significant defects for one year from purchase date. (There is no warranty on accessories such as headsets and cables). Manufacturer will repair or replace damaged or malfunctioning products at no charge, if within the warranty time limit and if there has been no damage by accidents, lightning or power surges, or misuse or abuse by the Buyer/User. Buyer must return any defective hardware prior to Manufacturer's shipping a replacement or Buyer must give a credit card number authorizing a charge until the defective hardware is returned to Manufacturer. Buyer/User and Manufacturer will each pay the shipping costs of returning any items to each other for repair or replacement. THERE ARE NO WARRANTIES THAT ARE NOT INCLUDED HERE.

* **TECHNICAL SUPPORT:** To begin using Technical Support, Buyer/User must first REGISTER at www.tellacom.net. One Hour or One Year (whichever comes first) of Technical Support is included with the purchase price for the original Buyer/User. Additional Technical Support may be purchased for \$50 per hour. Technical Support includes helping User install and learn how to use this software and hardware. Technical Support does not include teaching the User how to use a computer or how to use other vendors' software such as Windows or databases, or how to use telephone systems or network computers. Technical Support can explain to the User how to import and manage User's telephone number lists and Do Not Call lists, but Technical Support cannot actually edit or modify User's lists for him/her. If User does not have basic computer skills, a professional should be hired to contact Technical Support for installation and training. Technical Support hours are 9 am to 6 pm (US Central Time Zone), Monday through Friday, except for holidays. User may at any time leave VOICE MESSAGES or send E-mails with questions. Technical Support will make every reasonable effort to resolve questions and problems on a timely basis, within the times listed above; however, Technical Support may not always be able to resolve every problem, nor respond to every call immediately.

* **SOFTWARE & MANUAL UPDATES:** After the initial purchase, updates to the Software and Manual are available free of charge if Buyer obtains them from Manufacturer's Technical Support Web Site. A new copy of the Software on a CD is \$20 and a printed hard copy of the Manual is \$20. These prices include shipping by US Post Office. Overnight shipping is an additional \$10 in the USA.

* **RETURN POLICY:** Buyer can examine this product online before purchasing. After purchasing this product, from the date the product is delivered, Buyer will have a maximum of 14 days to return it, in good condition, to EVS for a full refund, less 15% restocking fee and any shipping charges. There will be no refunds in the event that Buyer's phone service provider changes their features, prices, or policies, or if there are any changes in laws affecting the use of this product.

Please carefully read and sign the following "Liability & Responsibility".

Liability & Responsibility

The Seller and Manufacturer strive to provide the Buyer/User with the highest quality software and hardware; however, there are a number of factors that can cause system malfunctions including, but not limited to, operator error, software corruption, software bugs, telephone line problems, electrical surges, hardware defects, and computer failures. The Seller and Manufacturer and its Technicians cannot be responsible if the Buyer/User adds other software or hardware that corrupt the system or for any other malfunctions.

The Buyer/User is responsible for making frequent backups of his or her system to protect against any loss of valuable data. The Seller and Manufacturer and its Technicians cannot be responsible for loss of data for any reason whatsoever. The Seller or Manufacturer will not be liable for any lost revenue, lost profits, penalties, fines, legal judgments, or other expenses due to loss of data, hardware or software problems, or for any other reason.

This product has the capability of being operated in various ways and for various uses. The Buyer/User assumes all liability and responsibility for only operating this product legally, according to federal, state, and/or local laws. Laws are complex and may change from time to time, and laws vary from country to country and from state to state. A violation of any such laws could result in significant penalties and other sanctions. Prior to buying or using this product, the Buyer/User should consult with an attorney to determine the extent of permissible activities. The Seller and the Manufacturer and its Technicians and Representatives are not attorneys; therefore, any interpretations of laws regarding the use of this product should not be completely relied upon. It is your responsibility to determine specifically what is legally required for your operation and to therefore use this product in a manner that will comply with any such laws. After purchasing this product, a refund is not available if any laws are later changed affecting the use of this product.

Note: Informational calls (not attempting to sell goods or services) are not subject to various laws regulating Telemarketing calls. A summary of some of those laws relating to Telemarketing calls is described in the section below:

TELEMARKETERS BEWARE: If the Buyer/User intends to use any outbound dialing products (auto dialer, power dialer, predictive dialer, or fax broadcaster) for solicitation purposes (selling goods or services), there are laws or rules including, but not limited to, the following:

Do Not Call: The Buyer/User should be aware that he or she may be responsible for monthly “scrubbing” of calling lists against Federal and/or State Do Not Call Registry lists. (The Manufacturer of this product provides the Buyer/User with tools to assist in cleaning the Buyer/User’s dialing lists of Do Not Call telephone numbers if required; however, the Manufacturer cannot guarantee 100% integrity or reliability of these tools.)

Cell Phones: It is not legal to call cell phones to attempt to sell goods or services with either a pre-recorded message or with live agents.

Predictive Dialing (calling to speak to people live): If using a predictive dialer, there are laws regarding “DROPPED CALLS” or “ABANDONED CALLS”, which are calls that are not connected to a live agent. Among other things, those laws may require: 1) not hanging up before 15 seconds or 4 rings, 2) playing an informational message if the call is answered but an agent is not available, and 3) not abandoning more than 3% of calls, calculated over a 30 day period.

Auto Dialing (calling to leave pre-recorded messages): Effective December 1, 2008, per the US Federal Trade Commission, in the beginning of the pre-recorded message, an automated key press must be available so that consumers can opt out of the call as easily as they can from a live telemarketing call. If a message is left on an answering machine or voice mail, a toll free number must be provided for the recipient to call to opt out of any future calls. Effective September 1, 2009, per the US Federal Trade Commission, telemarketers cannot call people with a pre-recorded message to sell goods or services, unless they have prior written (or electronic) permission from the recipient of each call, regardless of whether it is answered live or by an answering machine or voice mail. Having a previous business relationship will no longer be sufficient. The following are exempt from the prior written permission requirement: informational calls, political calls, charitable solicitation calls, and healthcare related calls that are subject to HIPPA.

By using this product, the Buyer/User accepts 100% of the responsibility and liability regarding its use and will hold the Seller and the Manufacturer and its Technicians and Representatives completely harmless from any fines, penalties, litigation, expenses, or claims for any reason.
